Increase gg knife distance duel
Posted by liger - 24 Oct 2010 23:21

When dueling with knifes (1-1, fight thru vote)

Distance between players should be bigger to receive knifes. Now u almost have to kiss the opponent to get the knifes.

I believe that the mod has no control over that as it would mean changing how knife work in terms or reg

Just saw this, what you mean?

I get a knife when I accept the knife fight. Not later...

You say you only get a knife when you are near the other guy? Or the actual distance of knifing (that is built into the engine but you know that)

---

u get teleported near each other. But u dont get a knife. U have nothing untill u are VERY close to your opponent (within a knifing distance)

would be nice if ud get a knife as soon as both accept the knife fight

You get teleported then after a timer has gone down you get your knife so that you can move away abit before you start, we could shorten this time thou

---

oh it might be just that. Maybe it coincided with me getting closer to an enemy and i thougt u have to get close to get a knife.

Ill test it out when i have time to play. Which could be today or next year -.-

The timer seems to be tied to some functions on the script (remove player weapons, teleport players and then make sure its all ok before giving the knife).
