

When going on to server,

Posted by Coolio - 10 Jan 2011 20:56

When joining, I keep having to download (every time) this holiday/eye thing, any idea why?

I get the same thing with a sound of some sort when I go on the surf DM server, it only takes a second, literally. Does it take long? and are there any other things you have to download which are the same as when you first went on?
