

hlstatsx is not working on CSS deathmatch...frozen

Posted by Shootme - 06 Apr 2012 12:40

Yo

hlstatsx page has frozen ??? v.strange, tried on 3 computers, and always showing last nights information

Cheers

I just tried it and it seems the stats have disappeared off the server 😞
Hopefully it will come back when the server restarts but I don't
may need some1 to give it a kick start xD.

Hello to all, Yeah we have the same problem on the warcraft server, this means, You can not type 'rank' to find out your rank no more (just doesn't work)! 😞
However the rank is still applying (if you check on the stats page)

Thanks

EDIT: Just checked on stats and my last login date is: Thu. Apr. 5th, 2012 @ 20:42:56, but its actually the 9th of april, so now i don't think thats working? 🤔
, then again just looked at spiderpigs and his is the 4th, but he was also on the server at the 9th so maybe its just set wrong on the date?

Yo

any clues on Hlstatsx and when it will be backup as its still frozen

Cheers
