FF on old WCS server
Posted by FadeToBlack - 06 Jul 2010 14:29

_____

This now seems to be a regular Source server with FF on and nothing to prevent constant TK. Any way to add a mod to kick player that constantly TK or just turn FF off?

_____

loll

it just gets a little frustrating. i think every single warcraft player has asked at least one of the admins about whats going on with the server.

you should read the article's on the front page of the site, will give you updates on the servers and other things from the community.
