Minecraft RC2

Posted by Tunes - 18 Nov 2011 10:39

_____

Ouch, I almost missed this one...

Mojang release a new RC2 (four days ago), so I've updated the testing server

Download the client here assets.minecraft.net/rc2/minecraft.jar

And if you feel like hosting a server, get it here assets.minecraft.net/rc2/minecraft_server.jar

As usual, only the binary must be changed, run this on windows to find it explorer %APPDATA%.minecraftbin , copy paste the current .jar and download the RC2 there.

The server is available at mc.twkgaming.com port 25590, its vanilla, no flight survival mode.

Have fun!
