Item and Command Errors
Posted by LordChaosMind - 01 Jan 2013 01:44

_____

I did not see any other topic covering this so here goes:

1. Two of the MCMMO commands do not work. Notably, /mining and /herbalism. It just says an internal error has occured.

2. The triple drops from super breaker do not appear to be happening. These problems could be linked to the unstable version r 1.3.13-dev-b1067.

3. I have been getting ink sacs from lapis veins. I'm not sure what is causing this.

(Also the MCMMO site has been down the past few days).

Thanks.

_____

Close to an official 1.4.6 release, and it feels like 1.5 isn't far off xD
