End of stream means you can't connect to the server because of connection issues. We also already told you we don't IP ban. We've also told you you're not banned

Yeap, there are no ip bans on the server, besides some nations networks, where you aren't for sure.

Also Tunes, is there something else we can use that isn't MCBans? It's constantly down, and we banned someone earlier and they could still join

Really getting tired of mcbans, or we switch back to local bans or find another solution, I think they are dropping free connections to make admins pay for mcbans... no way jose.
