Just wanted to say, there seems to be a problem with sign gates. I don't know the name of the plugin, but it makes it so you can create gates with signs. Anyhow it seems to be broken. If you can plz fix. Thank you

I thought I had replied this, well, IRL taking really over me and the server is pretty much abandoned, so I didn't had the time yet to take a closer look.

Sorry, will do when possible.
