

The hacker cesarmic30

Posted by gracielynn - 29 Oct 2013 01:06

I was online with this player named cesarmic30 (guest). he let me come to his base I looked in his chest and he had 3 stacks of diamonds and another 35. I killed him and got those diamonds and I was wondering how he got so many diamonds when he is kinda new to the server. I asked him if I can see his mine he said no its a secret. I walked back to his base (I put the diamonds away) in my best armor. (helmet, boots leggings protect 3 chestplate protect 2) andi had rifting with me. cerarmic30 kill me with his fist with about 6 or seven hits and killed rifting. And with the unarmed bug (unarmed skills wont go up) im pretty suspicious. Thanks.

Well first off, that is allot of diamonds he might be cheating, and he might not be because guests is just a rank. When a guest joins the server that is the rank they get. To become member, they must go on the forms and ask to become a member. But many guests dont do this. So there could be guests that could have been playing for years and never asked for member.

Now about 6 hitting you. He could have high unarmed, or he might have hacked. But there is no proof of this so I don't think the admins will be able to help you much here Gracie. And was rifting with you to help you fight and what was his armor?

Well rifting was wearing iron armor. But I sure wish I knew what his unarmed is that is probably my only proof.

I did a lookup on him and he has been banned on another server once before for "griefing/mods". We'll keep an eye on him and if we catch him doing anything out of the ordinary, he'll be punished as necessary.
