So there is no chance of Mattlgroff and Wipf777 to be unbanned, or on super watch? I do apologize for using hacks, and now that I got caught using them, they don't bring me any fun...just being banned. Thank you for the experience on your server, and I will write you a good review. Enjoy your server. Sorry again for using hacks.

How we know they don't belong with you and you just want them unbanned so can destroy everything on server?

Seriously, if they were with you, they won't be unbanned, and after taking a look at this [mcbans.com/player/benboy1995](http://mcbans.com/player/benboy1995)

I will add a few more lines in your file.
