Forum update

Posted by DreamState - 01 Jan 2011 13:36

_____

I've undertaken a forum update today which *seems* to have worked.

However, it will reset 'recent posts', etc so expect to see some 'latest' stuff blank.

Please post here if any issues.

Cheers.

_____

i did a refresh and got error :

Fatal error: Cannot use object of type __PHP_Incomplete_Class as array in
/home/twkgaming.com/public_html/plugins/authentication/phpbb3_auth.php on line 48

_____

Excellent - I just turned on the error reporting.

That helps alot - will look into it.

_____

Thanks to M3ntoz, we have a resolution for this.

However, if you are getting this also in one browser, please contact me on Steam as I would like to try a couple of things to see if I can get it permanently sorted!! Many thanks.

_____

ADBLOCK: for now i think ppl should be testing without the adblock (or just whitelist twk)

u never know which rule might come into play here

_____

Hopefully the blank page is sorted now but worth checking the adblocker.

I think i prefer the autosubscribe on as might encourage people back if they are reminded?
