Ok,

I have noticed on a lot of servers that many people rage in chat after being killed or raided. instead of raging in chat, run outside on your street or wherever you live and just yell "I WAS JUST KILLED" and then come back inside and sit back down and tell everyone on the server how many people stared at you or looked at you weird.

Thanks,

People Who don't Like Chat Spammed. SO EVERYONE

Ps: if You don't follow this many People will rage at you and then guess what, You'll be raided again.
