

ATI Catalyst 10.5 beta

Posted by slaB - 06 Apr 2010 13:38

There's been a lot of commotion about this 10.5 driver which has been leaked to the internet. This driver contains a lot of new stuff, it's 380mb in size and includes driver for every Windows version and for many legacy video cards. It also includes a new Video Converter option in the Advanced View. And, in the shortcut list of options in the All Programs list there's a " www.amd.com/us/products/technologies/swi...aspx:11rcqcwe" option.

This is some other stuff it contains/supports:

XP/XP64/XP-MCE

Vista

Win7

ATI MB drivers

SB Drivers

SmartGart

HDMI Drivers

Application Profiles

AVIVO drivers

Transcoding

Hydravision

Raid Xpert drivers

MCE Encoders

WMV9/VC-1 Decoder

Web Pam

Mobility Drivers

Radeon Drivers

AGP Radeon Drivers

Fire Pro

Intel Switchable Radeon Drivers

Cards to be released Drivers

It has also fixed flickering and some other bugs in Bad Company 2.

Now, if you want to try it out on your own risk, uninstall previous drivers THEN install the 10.5 BETA. But you might want to check this out too: twitter.com/CatalystMaker/status/11651731399 " onclick="window.open(this.href);return false;

A lot of people have installed this, some have experienced results and some have not.

You can download it from Megeupload here: www.megaupload.com/?d=WH2U3WZG " onclick="window.open(this.href);return false;

Or from RapidShare:

rapidshare.com/files/372652003/ati873dri...e.rar.002.html " onclick="window.open(this.href);return false;

rapidshare.com/files/372651946/ati873dri...e.rar.001.html " onclick="window.open(this.href);return false;

rapidshare.com/files/372652006/ati873dri...e.rar.003.html " onclick="window.open(this.href);return false;

I'll wait for the official version

The bc2 glass flikering is indeed a pain, but it's also strange that is only sometimes...
