Here's where my problem lies, I go to install it and it says: The Steam servers are currently too busy to handle your request. Please try again in a few minuites. Now I tried again in a few mins, and then I tried again in a few MORE mins, then a few hours, then a whole day. Still the same bloody message! Any ideas what's going on? (I've also tried restarting steam) Re: Unreal Tourament 3 Posted by eskimo - 07 Mar 2009 18:10 ermm everybody has got this and beause it such a popular game everybody has tried to dload it and therfore the steam conten servers are being used to much therefore only some can dlaod at a time. thats my guess xD Re: Unreal Tourament 3 Posted by Che ken - 07 Mar 2009 22:05

So everyone got it? that'd be why then (I should check steam news more...)
