Unreal Tourament 3
Posted by Che ken - 07 Mar 2009 13:43

_____

Right, now I dunno if this was given out by steam for everyone, but what I do know, is that the entire UT3 is on my steam id as a gift, and I have 1.3 days to install it.

Here's where my problem lies, I go to install it and it says:

The Steam servers are currently too busy to handle your request.

Please try again in a few minuites.

Now I tried again in a few mins, and then I tried again in a few MORE mins, then a few hours, then a whole day. Still the same bloody message! Any ideas what's going on? (I've also tried restarting steam)
