WAX 2.0 Converting
Posted by PeanutAlmighty - 24 Feb 2011 12:59

_____

Hey

I know lots of people have trouble using the wax converter, and it's usually something stupidly simple, but I've looked at everything. All the help forums, all the yahoo answers, and I still havn't found an answer.

My video converts, but doesn't play. It says It's unreadable. I've tried it with about 5 codecs, and converters, and they all say the same.

Help me TWK, you are my only hope.
