Computer Build

Posted by GeneralDonno - 13 Mar 2013 02:21

Me and Chif built a computer today and i thought i would share the adventure with the forums

A little stack of some of the parts and case - Thats a 2ltr bottle for size referance 😄

A couple of mid build pictures-

And the completed Rig-

The whole build took us about 5 hours and was a little tricky but we managed it. Trying to install windows 7 took the absolute piss, changing which sata3 ports it went into, updating the bios, damn partioning and the hard-drive in general.... 2 hours later we managed to fix all the minor issues 😄

Specs of my new Rig:

case   : CM Storm Trooper

OS   : Windows 7 Home Premium

Motherboard: Asrock x79 Extreme4

Processor : Intel i7-3820 LGA 2011

 CPU cooler: Intel Rts2011AC

RAM   : Kingston Hyper-x 16GB DDR3 Quad Channel

GPU   : 2x Palit GeForce GTX 670 2GB Jetstream

Hard Drive : 3TB

Power Supply : OCZ 1250W ZX series

Audio   :Built in 7.1 HD realtek audio

DVD RW and Card Reader

If you ever wondered what my room looks like-

_____

Omnomnom! Had a lot of fun building this

Surprised it went so smoothly for our first build
just the hickup with the bios not liking the SATA3 port the hard drive was in xD (and a couple of other minor things)

_____

Pretty nice rig you have there!

First build? Geeesh
Nooooooobbbzzz

I just wanted a woman for every machine I've built in the last 20 years

_____

Yeah it's our first build. Quite proud we got it all completed and working

I take it then that you have built quite a few systems in your time then tunes xD

_____

I build a system at least once or two per week, some regular and some quite overpowered and some built to server specs, it really depends on what the costumer wants.

Build a gaming computer and send it to me? Mine is terrible and cannot afford a new one :/ (or parts)

Of-course I joke. But yeah, thats pretty cool.. Me, my dad and my brother have made every computer I've ever owned so-far (except my laptop :p)

_____

If you built your own laptop I would be very impressed

Um yeah! thanks for sharing guys looks good! Nice parts! The cables could use a bit more of a tidy tho

How is it sound wise ?

_____

its awesome
but the cables can go die
that is something that can come with experiance

==

Re: Computer Build
Posted by Chifilly - 15 Mar 2013 07:43

_____

Yeah, those cables were so braided their thickness was the size of me arm, so we just thought "stick 'em as far right as possible and that'll do" xD
